

Conclean

PRODUCT DESCRIPTION:

Controll®ConClean, acid cleaner, is an environmentally-friendly alternative to hydrochloric acid. It's not corrosive and does not contain any hazardous substances for the user or the environment during normal use.

USES:

Acid wash of most stone/concrete surfaces such as brick, concrete, natural stone etc. It has a very good effect on lime deposits, rust stains, efflorescence as well as tools for bricklaying and concrete.

PREPARATION:

It is recommended to dilute the product 1:1 with water for heavy tasks, easier tasks can be diluted 1:2 up to 1:10. Must not be used with other chemicals. Always do a test in an inconspicuous area if you suspect tender surface!

WORKING TEMPERATURE:

Avoid working temperature of the surface below 5 ° C, as most chemicals have reduced effect if temperature falls below this limit.

APPLICATION:

Apply with a brush, roller or low-pressure sprayer, then go slightly over with scrub to create movement in the active solution. Rinse off with plenty of water.

CLEANING:

Water and regular soap.

PROTECTIVE MEASURES:

If used by given instructions the product represents no health hazard. If risk of splashing, wear safety goggles or face shield. For prolonged or frequent use is recommended to use rubber gloves, or protective clothing as needed.

SAFETY:

Irritating skin

ENVIRONMENT:

Controll®ConClean satisfies the requirements for acid cleaners in regulations concerning discharge of wastewater.

TECHNICAL:

Form/Consistency:	Liquid
Colour:	Shiny/yellowish liquid
Odour:	None
Solubility:	Soluble in water
Boiling point:	>100 °C
Density:	1.1 / 20 °C
Temp. of use:	5 – 40 °C
pH - concentration:	1.5 ±0.5
Biodegradable:	Yes
Packaging:	25 litres
